# TeamsCode

## 501(c)(3) Nonprofit Organization

TeamsCode is a student-run nonprofit based in Washington state with the goal of increasing interest and activity in computer science among high school students.

### PROGRAMMING CONTESTS

We host live programming contests so students can learn teamwork and computer science, all while eating free food and getting awesome raffle prizes!

### BE A CREATOR

We help interested high schoolers organize their own programming events - contests, hackathons, and bootcamps. Please visit teamscode.com/contests if interested!

### MADE BY STUDENTS

TeamsCode is made for students, by students. We work with the Computer Science Teacher's Association and others to create events around the Pacific Northwest.

### MADE BY STUDENTS
